Key Points and Issues For February 2009

Director's Note

Both the U.S. and international equity markets continued to decline at a rapid pace in February, with the S&P 500 and MSCI EAFE indices down 10.65% and 10.27% respectively for the month. Perhaps even more telling, these indices are down 48.5% and 53.9% since the end of 2007. Since the end of 2007, we estimate that the pension fund returned -29.1%.

While we will focus on the performance and activity of the various segments of the portfolio below, I thought it would be appropriate to discuss the Division's investment activities over this period and their impact on the portfolio. While we have certainly made our share of good and bad investment decisions over the past two years or so, the major thrust of our efforts has been to reduce the risk level across the portfolio in response to the credit crisis and the global recession. From June 2007 through February 2008, we reduced the fund's exposure to public equities from 58.6% to 37.5%. While a portion of this decline is attributable to market depreciation, we also had net sales of public equities of \$5.9 billion during this period. A portion of these sales went to fund benefit payments, while the remainder went towards the purchase of fixed income securities and alternative investments – both of which have outperformed public equities by a wide margin.

Within our equity portfolios in particular, our conservative positioning with regard to financial services stocks (among other things) drove strong relative performance. We estimate that our domestic and international equity portfolios outperformed their respective market averages since June 2007 by 4.77% and 2.73% respectively.

Total Pension Funds

- For the month of February, the fund was down -4.35% versus -5.87% for the benchmark. (Note: the benchmark calculated since January is based on the new asset allocation plan adopted by the State Investment Council in December 2008.) Estimated performance for the pension funds for the fiscal year-to-date period through February 28, 2009 is -25.53% versus -29.12% for the Council benchmark. Our outperformance for the fiscal year is attributable to (1) our overweight position in domestic and international fixed income relative to public equities, (2) our underweight position in commodities relative to the benchmark, and (3) our underweight position in financial services stocks in both our domestic and international equity portfolios. For the fiscal year, we estimate that our outperformance has reduced pension funds losses relative to the market by more than \$2.8 billion. Total pension fund assets as of February 28, 2009 were \$56.4 billion.

- We were net sellers of \$220.3 million of U.S. equities in February. The major sales were of stocks in the technology, financial services and utilities sectors. We were also net sellers of \$421.1 million in international stocks, with sales concentrated in the telecommunications and financial services sectors. We continued to add to our long-term bond portfolio, with purchases totaling \$418.1 million for the month. Finally, we funded an additional \$111.4 million in commitments to various alternative investments in February.

Domestic Equity

- Performance for Common Pension Fund A for February was -9.34% versus -10.62% for the S&P 1500 Index, the benchmark for the domestic equity portfolio. For the fiscal year-to-date period, Common Pension Fund A returned -39.34% versus -41.78% for the benchmark. The major positive factors contributing to overall relative performance were our underexposure to the financial services sector, our program to purchase investment-grade fixed income securities at attractive yields in lieu of the underlying equity securities, outperformance within the health care sector of the portfolio, and our underweight exposure to GE (which alone accounted for 47bp of outperformance for the fiscal year-to-date period). The major negative factor impacting performance was our overweight exposure in the technology sector, which underperformed the market.
- As stated above, net sales of equities in the portfolio in February were \$220.3 million. The major sales during the month were in the technology, utilities and financial services sectors of the portfolio. Major names that were sold in these sectors include CA and Synopsis in the technology sector, Puget Energy in the utilities sector, and State Street, Aetna and Wells Fargo in the financial services sector. In addition to this activity, we continued to swap out of Verizon into AT&T within the telecommunications sector. Finally, we transferred our position in Transocean to Common Pension Fund D since Transocean is now domiciled in Switzerland and can no longer be considered a domestic equity security under the Council's regulations.

Domestic Fixed Income

- Performance for Common Pension Fund B for February was -0.43%, and -0.40% when excluding our TIPs and high-yield portfolios. This compares to -2.12% for our new custom benchmark for domestic fixed income, the Barclay's Long Government/Credit Index with a 50% weight for U.S. Government securities. For the fiscal year-to-date period, Common Pension Fund B (including TIPs and high yield) returned -1.46% versus +1.38% for the council benchmark (which prior to January 2009 was the unadjusted Barclay's Long Government/Credit Index). The duration of Common Pension Fund B (excluding TIPs) was 10.10 years as of February 28, 2009, versus 11.09 years for the adjusted Barclays Long U.S. Government/Credit Index.

- We had net purchases of approximately \$418.1 million in domestic fixed income securities in February, consisting of \$500.8 million in purchases of corporate bonds and \$39.0 million in purchases of TIPs, which were partially offset by sales of \$71.2 million of U.S. Treasuries and \$50.5 million of agency MBS. Major names that were added to the corporate bond portfolio were Caterpillar, Chevron, Cisco, Pepsico, Roche and Unilever.

International Equity/Fixed Income

- The equity portion of Common Pension Fund D returned -9.86% in February versus a return of -10.59% for the MSCI EAFE Index ex-Prohibited, the benchmark for the international portfolio, which is calculated by the Division and excludes those names deemed ineligible for investment under the State's Sudan and Iran Divestment Laws. For the fiscal year, the portfolio was down -47.6% versus -48.9% for the benchmark. Our portfolio of international sovereign bonds returned -0.88% for the month and +7.35% for the fiscal year-to-date period.
- We were net sellers of \$421.1 million in international developed markets equities in February, with the major sales coming in the telecommunications and financial services sectors. Activity in the telecommunications sector included the sales of Telekom Austria, NTT Docomo and KDDI, which were partially offset by the purchase of KPN. Within financial services, the major sale was our entire position in UBS (\$66.1 million) which was triggered by news over regulatory violations by its U.S. operation.

Alternatives

- During February we funded \$111.4 million of commitments to private equity and real estate and real assets. Major investments include \$10.6 million in the Spider Gold Trust (an ETF that invests in gold), \$12.8 million to Lexington Capital Partners, \$10.0 million to Carlyle Realty V, and \$14.1 million to the NJHL European Buyout Fund.
- Please note that the portfolio values shown on Exhibits 1 and 1a for private equity and real estate reflect the most recent valuations made available to the Division. In most cases, the values incorporated in our report reflect reported values as of September 30, 2008. (Note: Hedge fund market values are current). We expect the reported market values as of December 31, 2008, will likely be made available to us in March-April 2009, and that they will reflect some further declines in market values.

Cash Management Fund

- Total assets in the Cash Management Fund were \$12.7 billion as of February 28, 2009. The current yield is 1.14% for state participants, and 1.04% for “non-State” participants.
- The percentage of the portfolio invested in US T-bills/Notes, U.S. Agencies and Canadian government securities is nearly 85%, which is the highest percentage in many years. This increase is driven by our credit concerns of various issuers of other types of money market instruments; we have both eliminated names eligible for purchase and reduced our credit limits on these other issuers.
